

Overdrive® Herbicide

Kochia & Volunteer Canola

Technical Update

Overdrive Herbicide is now registered for Kochia & Volunteer Canola Control

Overdrive Herbicide:

- Post-emergent broadleaf weed control, including Group 2 & 9 resistant biotypes
- Fast-acting
- Multiple modes of action

Weeds Controlled:

- | | | |
|-------------------------------|-------------------------------|----------------------------------|
| • Biennial Wormwood | • Lamb's-quarters | • Vetch (Top Growth) |
| • Canada Thistle (Top Growth) | • Leafy Spurge (Top Growth) | • Volunteer Canola -- NEW |
| • Clover (Top Growth) | • Perennial sowthistle | • Waterhemp |
| • Dandelion (Top Growth) | • (Suppression) -- NEW | • Wild buckwheat |
| • Kochia -- NEW | • Pigweed | |
| • Lady's-thumb | • Ragweed | |

Best Management Practices for Kochia & Volunteer Canola Control:

- Overdrive @ 285 g/ha (3.4 kg jug treats 12 ha)
- Use a non-ionic surfactant, such as Merge® Adjuvant @ 0.25% v/v
- Apply to small, actively-growing weeds
- Registered for use in non-crop areas as well as range & pasture

Active Ingredients: Diflufenzopyr (Group 19) & Dicamba (Group 4)

Mode of action:

- Accumulates & concentrates synthetic and natural auxins in the weeds' key growing points in the root & shoot meristems
- Causes rapid uncontrolled cell division and growth
- Controls sensitive broadleaf weeds quickly

Always Read & Follow Label Directions
